

## Huawei Jordan Liquid Cooling Energy Storage

#### **Overview**

What is Huawei fully liquid cooled power unit?

Huawei fully Liquid-cooled power unit is a product oriented to electric vehicles for efficient energy conversion and power allocation. Compared with traditional solutions, Huawei innovatively adopts the liquid cooling technology and DC bus architecture. The product modules, and power sharing units.

What is liquid cooled power unit?

Liquid-cooled power unit is the core part of ultra-fast DC charging system for public charging station and other sites demandingmultiple fastchargers. With AC/DC and DC/DC modules decoupled, power units can better utilize power capacity and be accessible to DC ESS coupling.

How much power does a Huawei battery pack take?

It can sustain a maximum charging current of 2400 amps for a continuous 15 minutes, enabling a 300 kWh battery pack, typical for heavy-duty applications, to achieve a full charge cycle in just a quarter of an hour. Huawei claims this represents a nearly fourfold improvement in replenishment efficiency compared to traditional fast-charging stations.

How does Huawei's new charging system improve replenishment efficiency?

Huawei claims this represents a nearly fourfold improvement in replenishment efficiency compared to traditional fast-charging stations. A key technological innovation is the charger's immersive liquid cooling system.

How does Huawei's smart power system work?

The system incorporates Huawei's self-developed Silicon Carbide (SiC) chips, which offer triple the energy density of conventional silicon-based components. Intelligent features are also integrated, including an innovative power allocation algorithm that dynamically adjusts the output power, mitigating potential impacts on the electrical grid.

What is a liquid cooling system & how does it work?

A key technological innovation is the charger's immersive liquid cooling system. This design tackles the critical challenge of thermal runaway often associated with high-power charging, ensuring stable operation across a wide temperature range from -30°C to 60°C.

#### **Huawei Jordan Liquid Cooling Energy Storage**

#### How Huawei delivers fast, reliable charging

Its new liquid-cooling power unit integrates solar PV and energy storage that supports one-off deployment and long-term evolution. The full liquid-cooling design ensures ...
