

Huawei communication base station battery business

Overview

Huawei's communication energy storage batteries find applications in various sectors, significantly revolutionizing energy management practices. In telecommunications, these batteries support base stations and data centers, which often require uninterruptible power for continuous operations. How Huawei is accelerating the digital transformation of base stations?

Huawei is accelerating the digital transformation of base stations by adopting Al and IoT. Harnessing these digital technologies, 5G Power optimizes coordinated scheduling between various systems, such as power supply modules, site hardware, and the network.

What is the market share of base station equipment suppliers?

A world-leading market intelligence provider – TrendForce released the global market share analysis report of suppliers of base station equipment. The report discloses that more than 70% of the market is covered by Chinese and European suppliers.

Who owns the base station equipment market?

The report discloses that more than 70% of the market is covered by Chinese and European suppliers. The top three base station equipment providers are China-based Huawei with the share accounting for 30%, Sweden-based Ericsson with 23% shared and the third one is Finland-based Nokia with 20% market shares.
