

Huawei grid-connected inverter installation

Overview

How to install an awning in an IT power grid?

In an IT power grid, you need to set Isolation settings to Input not grounded, with a transformer. Battery terminals (BAT+/BAT) are reserved and the integrated battery solution has not been released yet. Two M6 screw holes are reserved on the sides of the enclosure for installing an awning. The SUN2000 is operating in grid-tied mode.

What is a grid-tied inverter?

Typically, a grid-tied system consists of the PV string, SUN2000, AC switch, and alternating current distribution unit (ACDU). indicates a power cable, indicates a signal cable, indicates wireless communication. If the inverter is connected to the FusionSolar app over its built-in WiFi network, only local commissioning can be performed.

Can fusion solar inverter be connected to a WiFi network?

If the inverter is connected to the FusionSolar app over its built-in WiFi network, only local commissioning can be performed. Power grid types supported by the SUN2000 include TN-S, TN-C, TN-C-S, TT, and IT. Figure 2-3 Supported power grids In an IT power grid, you need to set Isolation settings to Input not grounded, with a transformer.

Are electricians allowed to install Huawei products?

They are only supplements to the safety instructions. Only certified electricians are allowed to install, connect cables for, commission, maintain, and troubleshoot Huawei products, and they must understand basic safety precautions to avoid hazards.

How do I connect my sun2000 to the power grid?

Connect the PE cable. A three-phase AC switch needs to be installed on the AC side of the SUN2000. To ensure that the SUN2000 can safely disconnect itself

from the power grid when an exception occurs, select a proper overcurrent protection device in compliance with local power distribution regulations.

How do I Fix my sun2000 power grid failure?

Turn on the AC switch between the SUN2000 and the power grid. If you perform Step 2 before Step 1, the SUN2000 reports a Grid Loss alarm. The SUN2000 starts normally only after the fault is automatically rectified. Set the DC SWITCH at the bottom of the SUN2000 to the ON position.
