

Imported solar photovoltaic panels

Overview

Which countries import solar panels?

The Top 4 countries from which the United States imports solar panels are the same four countries in the ongoing AD/CVD investigation: Vietnam, Thailand, Malaysia and Cambodia. Imports from India, Indonesia and Laos are ticking up. Of note: 621.4 MW of panels came from Mexico, and 122.8 MW came from Canada.

How many solar panels did the US import in 2024?

The United States imported approximately 14 billion U.S. dollars worth of solar PV modules between January and October 2024. Almost 40 percent of these solar panels imported into the U.S. during this period came from Vietnam.

Why did solar panel import volumes increase in 2024?

U.S. solar panel import volumes have shown significant fluctuations from 2020 to 2024, reflecting global supply chain disruptions, policy changes, and market dynamics. The year 2020 saw relatively modest import levels due to pandemic-related constraints, but volumes surged dramatically in 2021, with a 193% increase compared to the previous year.

Where do US solar imports come from?

The vast majority of 2024 solar imports in the U.S. came from four key Southeast Asian nations: These four countries have become the backbone of America's solar supply chain, largely due to their manufacturing ties with Chinese solar giants.

Which country imports the most solar panels in the US?

Vietnam accounted for the largest share of US PV module imports in the second quarter, with 31.2%, followed by Thailand with 22.5%, Cambodia with 13.7%, and Malaysia with 12.9%. The four Southeast Asian countries together made up 80.3% of US solar panel imports during the period. Courtesy: S&P

Gobal Market Intelligence.

How will US solar panel import policies change?

Based on current trends and policy developments, U.S. solar panel import policies are expected to undergo significant changes in the coming years. The Inflation Reduction Act (IRA) has established new domestic manufacturing incentives, which may shift the balance between imports and domestic production.

Imported solar photovoltaic panels

[These are the countries the US imported solar panels ...](#)

So the best measure of how many solar panels the country is making is to look at silicon cell imports. Data shows that the United States ...
