

Industrial plant photovoltaic rooftop inverter

Overview

What is an industrial rooftop solar system?

An industrial rooftop solar system is specifically designed to meet the high energy demands of factories, warehouses, and large-scale production units. Unlike residential systems, rooftop solar for manufacturing units involves higher capacity, more complex wiring, and specialized components to support industrial-grade equipment.

Is rooftop solar a viable solution for manufacturing units?

With electricity bills consuming a significant portion of operational expenses, factory owners are now exploring rooftop solar for manufacturing units as a cost-effective and long-term solution. The shift is also driven by Environmental, Social, and Governance (ESG) goals and carbon neutrality commitments.

Can rooftop solar power a manufacturing unit?

Key areas where rooftop solar for manufacturing units prove effective include running energy-intensive machines like chillers, air compressors, furnaces, extrusion lines, and injection molding systems. This not only ensures continuous power supply but also significantly lowers peak demand charges from the utility grid.

How can a flat roof power a factory?

Leverage the flat roofs of factories to generate additional power for electricity-intensive machinery or HVAC systems. SolarEdge's energy ecosystem is designed to maximize energy cost savings, seamlessly integrating PV, EV charging and storage solutions, promoting safety in combustible environments, and minimizing carbon emissions.

How many inverters do you need for a 2 MW system?

The 2 MW system requires 22 inverters - which have also been developed to

deliver full power during icy winters or high temperatures on the roof in summer. Don't worry about your energy costs. Rather put your energy into solutions for your customers.

Industrial plant photovoltaic rooftop inverter

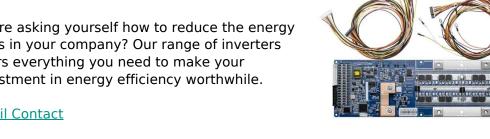

PV Inverters

The Right Inverter for Every Plant A large number of PV inverters is available on the market - but the devices are classified on the basis of three important characteristics: power, DC-related ...

Email Contact

Inverters for commercial and industrial PV and battery storage

You're asking yourself how to reduce the energy costs in your company? Our range of inverters offers everything you need to make your investment in energy efficiency worthwhile.
