

# Input tax on energy storage equipment

#### **Overview**

Can a taxpayer claim a production tax credit on energy storage technology?

The preamble to the proposed regulations suggests that there is a broader principle that allows a taxpayer to claim the ITC on energy storage technology that is co-located with a qualified facility (such as a wind facility) with respect to which the taxpayer claims the production tax credit under Section 45 (the "PTC").

What regulatory guidance has the government released on energy storage?

Of particular importance to the energy storage industry, the government has released final regulatory guidance for the ITC (both Section 48 and 48E of the Code), prevailing wage and apprenticeship (PWA) requirements, and transferability and direct payment, as well as other guidance on the energy community and domestic content tax credit "adders.".

Do energy storage systems qualify for a manufacturing exemption?

The Texas comptroller has published at least two private letter rulings explaining that energy storage systems do not qualify for the manufacturing exemption because the batteries are for storing the energy, and storage is not essential to generating the energy. 17.

Who can claim energy storage credits?

Taxpayers with a qualified facility and energy storage technology placed in service after Dec. 31, 2024 may claim the credit. Elective payment and transfer of credits may be available to certain applicable entities to include taxexempt organizations and government entities.

Are IRA tax benefits a viable option for energy storage facilities?

While the vitality of the IRA tax benefits in their current form is currently subject to uncertainty given the results of the 2024 federal general election, the existing market practice for financing energy storage facilities since the

IRA's passage continues to evolve in reaction to the act's new requirements and opportunities.

What is the energy storage credit and how does it work?

The credit ranges from 30 percent to as much as 70 percent for nonresidential installations if certain domestic content and community-related criteria can be met. This credit is expected to increase investments in energy storage and capacity additions to 27 gigawatts a year by 2031. 1
