How do I get 220V from a 110 volt inverter?

You would have to get a step-up transformer (perhaps auto-wound for lower costs) to get 220 from a 110 inverter. Re: 220v from two inverters?

Aloha, Can I parallel two of the same MSW inverters @ 110v each and get 220v single phase?

If so, then would I tie the two neutrals together?

Reference my system below. thanks.

What types of inverters are available?

We offer a variety of specifications and models of inverters to meet your power needs, whether for home, automotive, or travel purposes. The Leaptrend Sirius series 3000W 12V Pure Sine Wave Inverter is perfect for most off-grid systems, whether for a van, RVs, trucks, boats, yachts, coffee van inverter or any remote location needing power.

Can a 240 volt inverter be used with two 240V inverters?

You could use two inverters and tie their neutrals together. Most of better

ones won't care about this. The trick is if you have any 240vac loads they could have any voltage from 0 to 240v as the two inverters won't likely be in sync or stay in sync with one another, even matching ones. I would go the T240 / transformer route.

How to choose a wattage inverter?

1. Firstly, Size the Right Power Output. Inverters will be rated by a wattage value. According to this code, if there were 1000 Watt air conditioning and 800 Watt fridge; These electronics would be counted as 1800 Watts then require an inverter over 1800W. In this case, Leaptrend 2000W and 3000W inverters can perfectly cover your power needs.
