

# Is North Macedonia s solar panels a photovoltaic enterprise

#### **Overview**

Can North Macedonia develop solar energy?

The potential for solar energy development in North Macedonia is vast. With estimates suggesting that the country could harness up to 11 GW of solar PV capacity, there is significant room for growth.

What are the benefits of expanding solar energy capacity in North Macedonia?

One of the most compelling benefits of expanding solar energy capacity in North Macedonia is its potential to enhance energy independence. In 2021, approximately 33.2% of North Macedonia's electricity consumption was covered by imports.

How is North Macedonia transforming its energy sector?

North Macedonia's energy sector is transitioning towards cleaner and more efficient solutions. While lignite remains a primary energy source, the country is significantly increasing investments in renewables, including: Hydropower – A well-established sector with untapped potential for small and large-scale projects.

How will a new solar plant help Macedonia?

Andi Aranitasi, EBRD Head of North Macedonia, said: "The new solar plant will help the country, which faces severe air pollution from coal, to reduce its reliance on ageing coal-fired infrastructure. It will also generate cheap electricity in times of very high market prices.

What is North Macedonia doing right now?

Hydropower – A well-established sector with untapped potential for small and large-scale projects. Solar Energy – With high solar irradiation, North Macedonia is rapidly expanding photovoltaic (PV) capacity. Wind Power – Existing wind farms are operational, with further projects in development.

Who built the first solar plant in North Macedonia?

The 10MW solar plant, built on the site of the spent Oslomej lignite coal mine, was constructed by the public company JSC Elektrani na Severna Makedonija (ESM). This is the company's first solar plant in North Macedonia, developed with a view to diversifying energy sources and supporting decarbonisation.

#### Is North Macedonia s solar panels a photovoltaic enterprise

# North Macedonia renewable energy Output Soars by 20.8% in ...

The increase in renewable energy production is part of North Macedonia's comprehensive strategy to reduce reliance on fossil fuels and transition to a more sustainable ...
