

# Kiribati Wind Solar and Energy Storage Project

### **Overview**

Is Kiribati launching a solar PV project?

The Oceania located nation of Kiribati has started construction on the country's largest solar PV project that's backed by the Asian Development Bank and the Government of New Zealand. It will be accompanied by a battery energy storage system (BESS). The 7.5 MW South Tarawa Renewable Energy Project (STREP) is located on the Bonriki water reserve.

Does Kiribati have a solar power system?

Kiribati's outer islands are served largely with solar home systems, and Kiritimati island, the second largest load center (1.65 GWh in 2016), has a separate power system not managed by the PUB. 6. Constrained renewable energy development and lack of private sector participation.

How is Kiribati developing?

Another significant area for development is Kiribati's energy infrastructure. With a high reliance on diesel fuel for electricity, the country is looking to shift toward renewable energy sources as part of its broader efforts to combat climate change and ensure energy security.

How will Kiribati reduce fossil fuel consumption by 2025?

13 Kiribati committed to use renewable energy to reduce fossil fuel consumption by 2025 (23% reduction on South Tarawa, 40% on Kiritimati, and 40% on the outer islands). It has also set the target of using energy efficiency to further reduce diesel consumption by 2025 (22% on South Tarawa, 20% on Kiritimati, and 20% on the outer islands).

Does Kiribati need a new transportation system?

With the country heavily reliant on fishing and agriculture, the Kiribati government has prioritised projects aimed at upgrading its infrastructure and energy systems to support sustainable economic development. One of the

most urgent needs in Kiribati is the modernisation of its transportation infrastructure.

What is the Kiritimati Island energy roadmap?

One notable example of international involvement is the Kiritimati Island Energy Roadmap, a project supported by the Pacific Region Infrastructure Facility (PRIF) that aims to achieve 100 per cent renewable energy for Kiritimati Island by 2025. This is part of Kiribati's broader strategy to integrate renewable energy into its national energy mix.
