

Kuwait Energy Storage Photovoltaic Project Cost

Overview

How can photovoltaic & concentrate solar power help Kuwait?

Recognizing both the environmental and climatic hazards to be faced in the coming decades and the continued depletion of the world's most valuable fossil energy resources, Photovoltaic (PV) and Concentrate Solar Power (CSP) can provide critical solutions to electricity supply in Kuwait within relatively short time frame.

Should we implement PV solar system in Kuwait?

Furthermore, it will mitigate the image of oil exporting countries excessive and irrational consumption of fossil fuel. Hence, based on this preliminary analysis the study recommends the implementation of PV solar system in Kuwait in order to diversify sources of energy.

Is solar energy suitable for climatic conditions in Kuwait?

Among RES, solar energy is possibly the most suitable for the climatic conditions in Kuwait. Kuwait's annual solar irradiation is estimated at around 2100–2200 kWh/m. The average daily irradiation (direct normal) is also very high compared with countries that are currently among the main users of solar energy such as Germany and Spain.

Where should a power plant be located in Kuwait?

The optimal location for the power plants is determined to be Al-Wafra in Kuwait. The analysis results have been compared, and the advantages and disadvantages of each technology are reported. The CSP power plant requires USD 480million, and the PV power plant requires USD 100million capital investment.

How much does electricity cost in Kuwait?

As indicated in , the cost of producing electricity in Kuwait is around 0.12 \$/kWh estimated at \$50 per barrel of oil. The energy cost component

constitutes around 68% of total cost, and the remaining costs include depreciation, operation and maintenance.

Kuwait Energy Storage Photovoltaic Project Cost

Shagaya Photovoltaic Project

Energy & Building Shagaya Photovoltaic Project The Kuwait Institute for Scientific Research (KISR) has developed the innovative Shagaya Renewable Energy ...
