

# Lesotho base station computer room hybrid energy residential building

# **Overview**

Is Lesotho launching a solar mini-grid project?

The second phase of a pioneering solar mini-grids project in Lesotho is underway following the completion of a pilot project funded by REPP in Ha Makebe village, north-east of Maseru.

Will Lesotho be able to pilot a hybrid solar PV mini-grid?

Successful pilot hybrid solar PV mini-grid in Lesotho paves way for a further 10 mini-grids that will provide first-time energy access to 30,000 people and clean power to seven health clinics.

What is Lesotho's new mini-grid?

The pilot mini-grid and those of the planned larger portfolio are solar PV hybrids with battery storage and limited LPG backup generation. The hybrid nature of the design is to ensure 24-hour, year-round electricity supply, including Lesotho's harsh winters.
