

Lithium battery photovoltaic panel manufacturers

Overview

Who makes lithium batteries in China?

The Chinese market is driven by large-scale manufacturers like BYD and CATL, which lead the lithium battery industry. The United States is home to key players like Tesla, while South Korea contributes with major companies such as LG Chem and Samsung SDI.

Which country produces the most lithium-ion batteries in the world?

According to reports, China accounted for over 70% of the world's lithium-ion battery production in recent years, thanks to its advanced supply chain and manufacturing capabilities.

Which batteries are used in our inverters?

For batteries, we only use Class A LiFePO₄ batteries from China's top five brands, using BYD automotive-grade smart BMS technology. Our inverters' core components are adopted with international brands. Such as, IGBT is from INFINEON, and MOSFET is from TOSHIBA.
