

Lithium battery station cabinet power

Overview

What is a lithium-ion battery charging cabinet?

Justrite's Lithium-Ion Battery Charging Cabinet is engineered to charge and store lithium batteries safely, mitigating common risks during charging.

How many receptacles does a lithium-ion battery cabinet have?

This patent-pending design for our lithium-ion battery cabinet offers the highest level of protection. With eight receptacles, it allows for simultaneous charging of multiple batteries up to a maximum of 4kWh, providing a reliable and efficient solution.

Do lithium ion batteries fire?

Most lithium-ion battery fires occur while charging. The Justrite Lithium-Ion Battery Charging Safety Cabinet is made with a proprietary 9-layer ChargeGuard™ system that helps minimize potential losses.

How many kWh can a battery storage unit hold?

This battery storage unit has a max capacity of 4kWh. It includes an 8-receptacle power strip to allow you to charge multiple batteries at once. The lightweight, benchtop design makes it easy to move the cabinet wherever you need it. Lockable doors keep your lithium-ion batteries securely stored and safe from theft.

What is a Justrite battery storage cabinet?

Every Justrite battery storage cabinet is made from strong 18-gauge steel. It has double-walled sides, top, and bottom with a 1.5-inch air gap between the walls. The manual-close doors have baffled vents and a unique flame arrester pattern. They are supported by continuous piano hinges for a secure and reliable closure.

How many lithium-ion battery fires occur a year?

There are over 5,000 Lithium-ion Battery fires per year. The National Fire Protection Association (NFPA) estimates the direct and indirect costs for USA commercial business fires to be \$15.9 billion, annually. Most lithium-ion battery fires occur while charging.
