

# Lithium-ion energy storage battery costs

### **Overview**

How much does a lithium-ion battery storage system cost?

Recent industry analysis reveals that lithium-ion battery storage systems now average €300-400 per kilowatt-hour installed, with projections indicating a further 40% cost reduction by 2030. For utility operators and project developers, these economics reshape the fundamental calculations of grid stabilization and peak demand management.

How much does a lithium ion battery cost?

In the European market, lithium-ion batteries currently range from €200 to €300 per kilowatt-hour (kWh), with prices continuing to decrease as manufacturing scales up and technology improves. Power conversion systems, including inverters and transformers, represent approximately 15-20% of the total investment.

How much does battery storage cost?

The largest component of utility-scale battery storage costs lies in the battery cells themselves, typically accounting for 30-40% of total system costs. In the European market, lithium-ion batteries currently range from €200 to €300 per kilowatt-hour (kWh), with prices continuing to decrease as manufacturing scales up and technology improves.

Will lithium-ion battery price decrease through 2050?

The national laboratory is forecasting price decreases, most likely starting this year, through to 2050. Image: NREL. The US National Renewable Energy Laboratory (NREL) has updated its long-term lithium-ion battery energy storage system (BESS) costs through to 2050, with costs potentially halving over this decade.

Why is Bess so expensive compared to a lithium-ion battery?

A big driver of the fall in BESS costs will be a decline in the costs of the battery

cells and packs themselves, which can make up half the cost of a lithium-ion BESS.

How much does battery storage cost in Europe?

The landscape of utility-scale battery storage costs in Europe continues to evolve rapidly, driven by technological advancements and increasing demand for renewable energy integration. As we've explored, the current costs range from €250 to €400 per kWh, with a clear downward trajectory expected in the coming years.

### Lithium-ion energy storage battery costs

### 2022 Grid Energy Storage Technology Cost and
