

Malaysia allows the export of photovoltaic modules

Overview

In 2022, Malaysia's role in the global photovoltaic (PV) market was marked by significant export figures. Data from the Malaysia External Trade Development Corporation (Matrade) indicate that the nation's exports of PV products totaled RM41.6 billion, representing a 22% increase from the previous.

In 2022, Malaysia was the world's third largest manufacturer of photovoltaics, also known as , contributing 2.8% to the global output. This ranking placed Malaysia behind both China, which dominated the.

Malaysia is a major hub for solar equipment manufacturing, with factories of companies like , , TS Solartech, Jinko.

Should Malaysia export solar panels?

The minister emphasised that besides solar panel exports, Malaysia is also strong in the E&E sector and should consider expanding into other consumer products. Previously, the US announced a tariff hike on solar equipment exported from Southeast Asia to protect its domestic industry.

Is Malaysia a logistics hub for solar panels?

28 Oct 2024 Malaysia continues to serve as a logistics hub for solar panels amid the United States' (US) tariff hike on solar equipment from Southeast Asia, said Transport Minister Anthony Loke.

Is Malaysia a good place to buy solar energy?

Malaysia has emerged as an international hub for the manufacture of solar photovoltaic (PV) cells, wafers and modules. The southeast Asian nation has been comparatively slow to take up solar energy at home, however.

What is Malaysia's role in the global photovoltaic market in 2022?

In 2022, Malaysia's role in the global photovoltaic (PV) market was marked by significant export figures. Data from the Malaysia External Trade Development Corporation (Matrade) indicate that the nation's exports of PV products totaled RM41.6 billion, representing a 22% increase from the previous year.

Does Malaysia have a PV industry?

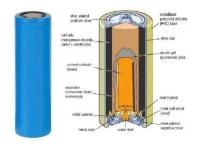

Having said that, despite US tariffs being imposed on Malaysia from 2018 to 2022, the Malaysian PV industry, along with that of its three Asean peers, has managed to grow, owing to the strong demand for the product. Almost all of the PV products manufactured in Malaysia — largely PV cells and modules (cells that have been assembled) — are exported.

What external factors have influenced Malaysia's solar energy sector?

Several external factors have recently influenced Malaysia's solar energy sector, particularly concerning international trade policies. In November 2024, the United States imposed new tariffs on solar panel imports from Southeast Asian nations, including Malaysia.
