

Mauritania invests in energy storage power stations across the country

Overview

Why should Mauritania invest in a battery energy storage facility?

The project will finance Mauritania's first large-scale battery energy storage facility, enabling the country to harness its abundant solar and wind resources for more reliable electricity. This investment is critical to the success of Mauritania's Mission 300 Energy Compact, which aims to achieve universal access to electricity by 2030.

How much energy does Mauritania use?

Some projects are emerging to benefit from solar, wind and biomass resources and to increase the access rate to the grid. According to RPTES/World Bank study, consumption of Energy Mauritania stands to 481.000 tonnes of oil equivalent (toe).

How does Mauritania get its electricity?

The last 24% is insured by the electricity importation coming from Manantaly hydro power plant based in Mali. In 2011, electricity production stood at 136 megawatts (MW) in Mauritania and was 100% from thermo power. Mauritania aims to increase and diversify its energy sources.

Does Mauritania have a good infrastructure?

U.S. International Development Finance Corporation (DFC), and Other Investment Insurance or Development Finance Programs: The World Bank's Logistics Performance Index (LPI) ranks Mauritania 157 out of 167 countries for the quality of infrastructure.

Does Mauritania offer energy incentives?

Although Mauritania has high energy potential, the government does not offer any incentives, such as feed-in tariffs, discounts on electricity rates, or tax incentives, for clean energy investments (including renewable energy, energy storage, energy efficiency, clean hydrogen).

Will Mauritania become a leader in green energy?

"This project will position Mauritania as a leader in critical minerals, green hydrogen and energy storage, —driving job creation and expanding economic opportunities for all Mauritanians," said Demetrios Papathanasiou, Global Director for Energy & Extractives at the World Bank.
