

Micro-controlled new energy flywheel energy storage products

Overview

What is a flywheel energy storage device?

Our flywheel energy storage device is built to meet the needs of utility grid operators and C&I buildings. Nova Spin, our flywheel battery, stores energy kinetically. In doing so, it avoids many of the limitations of chemical batteries.

How can flywheels be more competitive to batteries?

The use of new materials and compact designs will increase the specific energy and energy density to make flywheels more competitive to batteries. Other opportunities are new applications in energy harvest, hybrid energy systems, and flywheel's secondary functionality apart from energy storage.

Can a flywheel energy storage system control frequency regulation after microgrid islanding?

Arani et al. present the modeling and control of an induction machine-based flywheel energy storage system for frequency regulation after micro-grid islanding. Mir et al. present a nonlinear adaptive intelligent controller for a doubly-fed-induction machine-driven FESS.

What is flywheel/kinetic energy storage system (fess)?

and high power quality such as fast response and voltage stability, the flywheel/kinetic energy storage system (FESS) is gaining attention recently. There is noticeable progress in FESS, especially in utility, large-scale deployment for the electrical grid, and renewable energy applications. This paper gives a review of the recent.

Are flywheel-based hybrid energy storage systems based on compressed air energy storage?

While many papers compare different ESS technologies, only a few research, studies design and control flywheel-based hybrid energy storage systems.

Recently, Zhang et al. present a hybrid energy storage system based on

compressed air energy storage and FESS.

What is a beacon power flywheel?

The Beacon Power Flywheel , which includes a composite rotor and an electric machine, is designed for frequency regulation. Fig. 1 has been produced to illustrate the flywheel energy storage system, including its sub-components and the related technologies.
