

Moldova builds power supply for communication base stations

Overview

Does Moldova still receive electricity from transnistra?

In December 2022 Moldova agreed to continue receiving electricity from the Transnistra power plant at \$73 per MWh, later reduced to \$66MWh. Moldova announced in 2023 that it would no longer be buying electricity from the Cuciurgan power station once a high-voltage power line from Romania is installed, scheduled for 2025.

What happened to Moldova's electricity supply in 2022?

In November 2022 the power station located in Transnistra which produced electricity from Russian gas ceased supplying Moldova with electricity. Electricity was imported from Romania, albeit at a higher cost, helped by a grant from the EU of €200m.

How much energy does Moldova have?

Moldova lacks domestic sources of fossil energy and must import substantial amounts of petroleum, coal, natural gas, and other energy resources. The primary energy supply in 2018 was about half natural gas, a quarter oil, and solid biomass at one-fifth.

When did Moldova join the Energy Community?

Moldova joined the Energy Community as a full-fledged member in March 2010. Moldova, together with the other contracting parties, has the following tasks and obligations: The Energy Community acquis communautaire consists of roughly 25 legal acts.

When will Moldova stop buying electricity from Cuciurgan power station?

Moldova announced in 2023 that it would no longer be buying electricity from the Cuciurgan power station once a high-voltage power line from Romania is installed, scheduled for 2025. 2021, million kW*h.

Why is Moldova a partner country of the EU INOGATE energy programme?

Moldova is a partner country of the EU INOGATE energy programme, which has four key topics: enhancing energy security, convergence of member state energy markets on the basis of EU internal energy market principles, supporting sustainable energy development, and attracting investment for energy projects of common and regional interest.

Moldova builds power supply for communication base stations

<u>Communication Base Station Backup Power Supply , LiFePO4</u>

Unique solutions for DSL, VoIP and 3G Base Stations illustrate the wide range of power system architectures and the opportunities available for higher level integration.

Email Contact

We offer lithium batteries for golf carts, AGVs, AMRs, forklifts, and rack-mounted storage, along with power solutions for communication base stations and solar water pumping.
