

Mongolia lithium energy storage power supply procurement company

Overview

Could Mongolia become a battery manufacturing hub?

"Mongolia has lithium assets, Mongolia is building manufacturing facilities, the University of Science and Technology is well-versed in hydrogeology – a joint venture between the public and private sectors could put this manufacturing capability in Mongolia," Haji says - envisioning a greater role for the country in the global battery supply chain.

Is Mongolia's first lithium brine explorer?

Enter ION Energy, Mongolia's first lithium brine explorer. The company (listed on Canada's TSX Venture Exchange) has a license to explore lithium reserves in Sukhbaatar aimag and aims to export high-quality lithium into the burgeoning battery metals Asian market, which would put Mongolia at the forefront of the electric transport revolution.

What is lithium and why is it important?

Lithium is an incredibly useful metal. It's used to manufacture aircraft, it's a common treatment for bipolar disorder, and it's the main component in the batteries powering electric vehicles. As renewable energy and electric vehicles take off, so has the world's demand for lithium.
