

# Morocco s solar power generation and energy storage production

# **Overview**

What is Morocco's solar export strategy?

Morocco's solar export strategy is a bold bid for geopolitical influence. By 2035, the country aims to develop 20 GW of solar capacity, with half earmarked for export, the Ministry of Energy projects. Therefore, this vision aligns with Europe's decarbonization goals, positioning Morocco as a linchpin in the transcontinental energy trade.

How does Morocco use solar energy?

In addition to wind, Morocco leverages its significant solar potential through PV systems, CSP, and PTCs. These technologies help diversify the renewable energy mix and maximize the natural resources of the country for electricity generation. Table 4.

How much energy does Morocco produce from renewables?

Production of energy from renewables lagged behind a little, at closer to 20% of the country's total in 2019. But the country has come a long way. Morocco has since pledged to increase the renewables in its electricity mix to 52% by 2030, made up of 20% solar, 20% wind and 12% hydro.

How will Morocco transform its energy sector by 2030?

It outlines that Morocco has developed a plan to transform its energy sector by 2030, aiming to increase the renewable energy share to 52%, with specific targets of 20% for solar power, 20% for wind energy, and 12% for hydroelectric power. This approach seeks to enhance energy security and reduce dependence on imported fossil fuels.

Will Morocco become Africa's solar energy pioneer?

Morocco's exceptional solar resources, reaching 2,264 kWh/m²/year in southern regions, position the country to become Africa's solar energy pioneer, new SolarPower Europe report reveals. Morocco's solar power

capacity could surge from 0.32 GW to 4.35 GW by 2028.

Can Morocco export solar energy to Europe?

Noor's success has laid the groundwork for Morocco's broader strategy, exporting solar energy to Europe. The complex demonstrates Morocco's ability to deliver large-scale renewable projects, earning the confidence of international partners.

# Morocco s solar power generation and energy storage production

# 2030 Morocco Roadmap

BNEF sees electrification through clean power as the basis of decarbonization, and therefore, as the backbone of the energy transition. The power sector is a major contributor to overall ...
