

Multifunctional mobile outdoor power supply

Overview

What is a portable power station?

A portable power station is like a big, rechargeable battery that you can take anywhere. It's handy for camping, outdoor events, or as a backup power source at home. You can plug in various devices like phones, laptops, and even small appliances to keep them running when there's no traditional power source available.

What is the best portable power station?

By far the most portable power station in our guide, the EcoFlow River 2 Pro weighs just 17 pounds and has a large handle along the back. The LiFePO4 battery inside is good for 768 watt-hours, and I managed to squeeze a little more out of it in my tests. The ports are great for camping trips, with everything you need to charge small gadgets.

What can a portable power station charge?

All portable power stations can charge up small gadgets like phones and laptops or be used to power lighting. Most can handle small appliances like mini-fridges or TVs. If you want to use power tools, an AC unit, or in the UK, a kettle, you need to be able to draw thousands of watts.

Are portable power stations democratizing power on the go?

The proliferation of portable power stations is democratizing power on the go. These batteries are great for keeping your devices powered, but they come in different sizes, prices, capabilities, and port options. How do you know which are the best power stations for your specific needs?

I've been testing and researching all the hottest ones.

Should you buy a portable power station?

The term "portable" is stretching it sometimes. Batteries are heavy. The larger-

capacity power stations are typically on wheels and have telescopic handles, and they are still tough to cart around. If you're looking for something you can actually carry on foot for a distance, you may need to temper your expectations on capacity.

What is a DJI power 2000 portable power station?

The DJI Power 2000 Portable Power Station is a great device for those who want ample power and capabilities without sacrificing portability. It has a large 2,048Wh battery, 3,000W of output, and a really nice selection of ports. Its 30-amp AC outlet can even power an RV!
