

# New Zealand Commercial and Industrial Energy Storage Batteries

#### **Overview**

Will Infratec be New Zealand's First Utility-scale battery energy storage system?

Infratec, a renewables developer, is in the final stages of assessment for New Zealand's first utility-scale battery energy storage system (BESS) with Power distribution company WEL Networks.

Can battery technology save energy in New Zealand?

transferring and using energy. In New Zealand, our hydro lakes store energy on a large scale. However, until now we have had limited options to store electricity cost-effecti ely close to where it is used. Around the world, battery technology now offers opportunities to store electricity economica.

What are the different types of battery energy storage solutions?

Our fully integrated, plug-and-play battery energy storage solutions (also known as BESS) come in different sizes, from 30 kVA to 1MW, to suit a wide range of industrial and commercial energy storage applications. They ensure maximum system effectiveness and efficiency.

What is a battery energy storage system?

A battery energy storage system (BESS) is a technology that allows for the storage of electrical energy in batteries, which can then be used to power electrical loads. BESS can be used for a variety of applications, including grid stabilisation, load shifting, backup power, and integration with renewable energy sources such as solar and wind power.

How much tax does a battery cost in New Zealand?

ed to pre-tax at 28% tax rate.12 Residential battery cost of capital 5% - no tax applicable to residential income, however n cost of system.CASE STUDIESWe researched the applications where batteries could be used in New Zealand, and the additional services th.

#### Can batteries be used in New Zealand?

n cost of system.CASE STUDIESWe researched the applications where batteries could be used in New Zealand, and the additional services th y might realistically provide. Of all potential options, we have fully developed the five most useful (and economically promising) as case studies, using the revenue and cost assumptions ou
