

New Zealand Power Storage Vehicle Manufacturing Price

Overview

How much will the electric vehicles market cost in New Zealand?

In terms of unit sales, it is estimated that in New Zealand will see Electric Vehicles market sales reach 15.60k vehicles units by 2029. Taking into account the volume weighted average price, it is expected that the Electric Vehicles market in New Zealand will have an average price of NZD US\$48.6k in 2025.

Can battery technology save energy in New Zealand?

transferring and using energy. In New Zealand, our hydro lakes store energy on a large scale. However, until now we have had limited options to store electricity cost-effecti ely close to where it is used. Around the world, battery technology now offers opportunities to store electricity economica.

What are the implications for New Zealand's EV supply?

The implications for New Zealand are that there is significant expected investment in EV production capacity and significant increases in sales. New Zealand would expect to increase imports in-line with these global trends. This means that, in the longer run, eg by 2030, there are expected to be no significant limits to EV supply.

Can New Zealand import new EVs?

New vehicles: There will be limits to what can be imported to New Zealand because of limited production capacity, focussed on supplies to more stringent policy-led markets. New vehicles: There are unlikely to be supply constraints for imports of new EVs.

How much do EVs cost in New Zealand?

The profile in New Zealand is different, with 62% of EV registrations to January 2021 being used imports, of which 78% (or 48% of total registrations) have been used Nissan Leafs. These can be purchased for less than NZ\$15,000.

Teslas make up 8% of the total imports of EVs to date in New Zealand.

Why are EV depreciation rates so high in New Zealand?

Depreciation rates are estimated to be high in New Zealand because of the higher levels of competition in supplies of used vehicles, which include both New Zealand new and imported used vehicles. This is true for EVs as well as other vehicle types.
