

North Macedonia New Energy Photovoltaic Panel Manufacturer

Overview

North Macedonia-based PiKCELL Group announced on Facebook that it would build a factory for the production of state-of-the-art photovoltaic panels in the Technological Industrial Development Zone (TIDZ) in Tetovo with German company AE Solar.Can North Macedonia develop solar energy?

The potential for solar energy development in North Macedonia is vast. With estimates suggesting that the country could harness up to 11 GW of solar PV capacity, there is significant room for growth.

What are the benefits of expanding solar energy capacity in North Macedonia?

One of the most compelling benefits of expanding solar energy capacity in North Macedonia is its potential to enhance energy independence. In 2021, approximately 33.2% of North Macedonia's electricity consumption was covered by imports.

Why does North Macedonia import electricity?

This shift can be largely attributed to increased investments in photovoltaic projects, which have bolstered local electricity production. Currently, North Macedonia imports electricity primarily from neighboring countries such as Bulgaria, Serbia, Hungary, and Greece.
