

Outdoor power supply is the most expensive

Overview

Which portable power station should I buy?

If you want a portable power station that's lighter than our upgrade pick, often costs less, and adds a small light, and you don't mind that it has less power, a single handle, and fewer outlets and charging ports: Get the Jackery Explorer 880. It weighs 21.8 pounds, and has an ergonomic handle on top and a small light built into the side.

Which portable power station has more outlets than Jackery explorer 300?

If you want a portable power station that has more outlets than the Jackery Explorer 300, often costs less, adds a light bar, and doubles as an uninterruptible power supply, and you don't mind that it's heavier and less powerful: Get the Anker Solix C300. It weighs 9.1 pounds, and it has a flat top and a long light bar.

Are portable power stations better than gas-powered generators?

In an emergency, these power stations offer some major advantages over gaspowered portable generators, despite being less powerful. Portable power stations are silent and don't produce additional emissions, so you can use them safely indoors and while you're sleeping.

Are portable power stations safe?

Portable power stations are silent and don't produce additional emissions, so you can use them safely indoors and while you're sleeping. And since they have no motor, you don't need to keep gas handy or perform the oil changes and other minor maintenance that a combustion engine requires.
