

# Outdoor power supply self-test

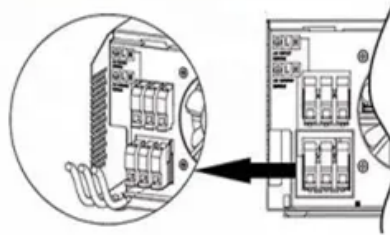

**Parallel** (Parallel operation up to 6 unit (only with battery connected))

**AC input wires**

**AC output wires**

## Overview

---

This video explains how to run a power supply unit's built-in self-test to check for issues. If the LED is solid and the fans spin, the power supply is functioning properly; if not, further investigation into the power supply or its components is necessary.
