

Palau Centralized Energy Storage Power Station Project

Overview

What is Palau's energy storage system?

energy storage system, was undertaken by Solar Pacific Pristine Power, a privately owned company. The plant will provide approximately 20 per cent of Palau's power needs, delivering up to 23,000 megawatt hours per year to the grid network, reducing Palau's reliance on expensive diesel generators.

Where is Palau's first solar power plant located?

We're proud to have supported the establishment of Palau's first utility-scale solar power plant at Ngatpang on Babeldaob. energy storage system, was undertaken by Solar Pacific Pristine Power, a privately owned company.

How many units of energy storage are in the Pala substation?

Chief Engineer Existing Substation Energy Storage Projects •2 units (1 MW / 3 MWh) installed and in production 2 Location Size (kW/kWh) Mfg/Integrator Status Purpose Borrego Springs Microgrid 500/1500 Saft/Parker Hannifin Production Peak Shaving, Time Shifting, VAr Dispatch, Island Support, PV Smoothing Pala Substation 500/1500.

What will Palau's solar PV project do?

The project, which is also Palau's first grid-scale solar PV plant, will contribute significantly to the country's nationally self-determined contribution to meeting global climate targets as agreed in the Paris Accord. These include reaching 35% renewable energy, and reducing energy sector emissions to 22% below 2005 levels, by 2025.

How challenging is a project in Palau?

"With a project in a location as unique as the Republic of Palau, the jurisdiction itself is challenging as the project engineering codes and local requirements are very specific," DNV energy systems project manager Michael Niu said.

Palau Centralized Energy Storage Power Station Project

Building Palau's first utility-scale solar power plant

An AIFFP loan and grant package has supported Solar Pacific Pristine Power to build Palau's first solar and battery energy storage facility, key to its transition to renewable energy.
