

Philippines Photovoltaic Energy Storage BESS Company

Overview

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

Will a Bess help optimise solar PV power plants?

Emmanuel Rubio, president and CEO of Meralco PowerGen Corporation, believes including a sizable BESS will help optimise the solar PV power plant and integrate it into the grid.

Why should you install a battery energy storage system in the Philippines?

BESS acts as a buffer between the grid and your facility, ensuring a consistent and reliable power supply. BESS can help keep essential appliances running in areas where power outages are common. Curious to find out how much you can save installing battery energy storage systems in the Philippines?

Why should you choose a Bess facility?

The smart and efficient services of BESS facilities allow for a more robust integration of renewable energy sources such as solar and wind energy to the grid. Our battery energy storage business is one of the ways we show our commitment to sustainable energy, as our BESS facilities also operate with zero emissions.

How many Bess facilities are there in the Philippines?

We are operating BESS facilities at 32 locations in the Philippines, across the regions of Luzon, Visayas, and Mindanao. Overall, we are putting up

approximately 1,000 MW of BESS facilities, which will help ensure the reliability of the grid, especially in areas that are in most need of power quality solutions.

What is Huawei's Bess supply agreement?

The agreement was announced yesterday (9 December) in a statement released by project developer Terra Solar Philippines, a company set up specifically for it as a subsidiary of independent power producer SP New Energy Corporation, which in turn is a subsidiary of developer Solar Philippines. The BESS supply agreement marks Huawei's largest to date.
