Overview

How many solar power plants will emerge in Côte d'Ivoire?

Powers of Africa Côte d'Ivoire. 12 photovoltaic solar power plants will emerge between 2025 and 2026. The Ivorian Minister of Mines, Petroleum, and Energy, Mamadou Sangafowa Coulibaly, announced the construction of 12 new photovoltaic solar power plants across the country between 2025 and 2026.

Where is the first solar power plant in Côte d'Ivoire?

In Boundiali in the north of Côte d'Ivoire, the country's first solar power plant has now been inaugurated by Ivorian Prime Minister Beugré Mambé and German Parliamentary State Secretary Bärbel Kofler. The power plant has already been providing up to 37 megawatts of power since June 2023.

How many solar plants will Ivory Coast have by 2040?

Likewise, the government plans to reach 1,686 MW by 2040. The Minister of Mines, Oil, and Energy of the Ivory Coast, Mamadou Sangafowa Coulibaly, has declared plans to add 678 MW of solar capacity by 2030 and 1,686 MW by 2040. Plans for the 12 new solar plants with a combined capacity of 628 MWp are listed on the government website.

Why did KfW build a solar power plant in Côte d'Ivoire?

"We also endeavoured to create employment for the local population," emphasises KfW Project Manager Clara Winkler-Tomety. During the construction phase, 75% of the workers came from the region. The new solar power plant in Côte d'Ivoire is helping to achieve the goals of German development cooperation in the expansion of renewable energies.

Why should Côte d'Ivoire invest in a solar power plant?

The solar power plant is regarded as a model project for the expansion of solar energy in Côte d'Ivoire. It is an important contribution to the fight against

climate change and a decisive step towards increasing the share of renewable energies in the country's electricity supply to 45% by 2030.

What is the goal of the Ivorian energy project?

The goal for the Ivorian State is to achieve a share of so-called clean energies estimated at 45% in the national energy mix by 2030, compared to 30% today. Finally, this project will eventually prevent more than 70,000 tons per year of carbon dioxide emissions, thereby improving the country's carbon footprint.
