

Poland Photovoltaic Power Generation and Energy Storage Project

Overview

How many GWh of energy storage capacity will Poland have by 2035?

In a bid to tackle the challenge of the growing electricity production from renewable energy sources, the Polish utility is looking to add more than 10 GWh of energy storage capacity by 2035. Its plans involve more than 80 projects, the value of which is estimated at around PLN 18 billion (\$4.7 billion).

How many solar projects are there in Poland?

The country has ambitious plans to significantly expand its renewable energy, with a particular focus on photovoltaics (PV). According to the Institute for Renewable Energy (IEO), there are more than 19 gigawatts (GW) of solar projects in planning or development in Poland.

Will Poland become a hotbed of energy storage project development?

Poland, Europe's tenth-largest economy, is set to become a hotbed of energy storage project development as the share of renewable energy on its grid soars. The country built out a record 1.2 GW of onshore wind power in 2023, according to industry body WindEurope, bringing its total installed capacity to around 9.4 GW.

Who invests in solar projects in Poland?

Investors have already been identified for 1,496 projects with a total capacity of over 3.3 GW. The main players in this area include companies such as Qair Polska, R.Power and Lightsource Renewable Energy Poland. These investors bring not only financial resources but also expertise to the Polish solar market.

What is the energy sector in Poland?

Our report offers an in-depth analysis of the Polish energy sector, focusing on investment potential, development trends, and regulatory frameworks. It

outlines the growing importance of renewable energy sources (RES), especially wind and photovoltaic power, and emphasizes the role of natural gas as a transitional fuel.

Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.
