

Poland s policy on adding energy storage to photovoltaics

Overview

What are Poland's energy storage subsidy programs?

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance.

Why should you invest in photovoltaic panels in Poland?

Photovoltaics, like heat pumps, have become one of the fastest-growing energy sectors in Poland. Investing in photovoltaic panels is not only a way to save money but also to increase independence from rising electricity prices. By generating electricity from renewable energy sources, you can protect the environment while reducing your bills.

Why should Poland invest in energy storage?

Development of energy production and consumption forecasting systems. Energy storage subsidy programs support the transformation of Poland's electricity grid into a more flexible and resilient system. Investments in storage facilities enable better integration of RES, improve grid stability and enhance the country's energy security.

How can energy storage facilities be improved in Poland?

Introduction of preferential loans for companies investing in energy storage facilities. Increasing the installed capacity of energy storage facilities by 300% by the end of 2025. Increasing the share of RES in Poland's energy mix to 35% in 2025. Reduction of CO2 emissions by 15 million tons per year.

What is Poland's energy storage program?

The program, "Electricity storage facilities and infrastructure for improving the stability of the Polish power grid," is aimed at companies planning to invest in energy storage facilities with a capacity of at least 2 MW and a

minimum capacity of 4 MWh.

When can I use the photovoltaic discount system in Poland?

Owners of photovoltaic installations installed in Poland before March 31, 2022, can still benefit from the previous discount system. Those who installed panels after this date could use the old system until July 1, 2024.
