

Poland user-side energy storage power station

Overview

What is the largest battery energy storage facility in Poland?

With a power output of 262 MW and a storage capacity of around 981 MWh, the facility will be by far the largest battery energy storage facility in Poland and one of the largest in Europe. The contractor on the project will be LG Energy Solution Wrocław.

What is the most advanced energy storage project in Poland?

The most advanced energy storage project in the PGE Group's portfolio is the Zarnowiec Energy Storage Facility. With a power output of 262 MW and a storage capacity of around 981 MWh, the facility will be by far the largest battery energy storage facility in Poland and one of the largest in Europe.

How many GWh of energy storage capacity will Poland have by 2035?

In a bid to tackle the challenge of the growing electricity production from renewable energy sources, the Polish utility is looking to add more than 10 GWh of energy storage capacity by 2035. Its plans involve more than 80 projects, the value of which is estimated at around PLN 18 billion (\$4.7 billion).

What are the new energy storage rules in Poland?

Poland's new rules state that energy storage facilities over 10MW require licensing to ensure they can provide services to Poland's National Power System\. Facilities 10MW or smaller do not need licensing but do need to register with the transmission system operator or distribution system operator for their area.

Will Poland have a power storage system?

PGE Group has obtained the first license promise in Poland for electricity storage. Yes, Poland will have a power storage system. The storage system will be set up at the 716-MW Zarnowiec pumped-storage power plant with

3,600 MWh of storage capacity.
