#### **Overview**

What is a mobile energy storage system?

An energy storage system contains a large amount of energy stored in a small space, which may make it the target for those who look to cause harm. For this reason, a deployed mobile energy storage system is required to be provided with a fence with a locked gate that keeps the public at least 5 ft (1.5 m) away from the ESS.

Are Aceon batteries suitable for portable energy storage systems?

AceOn are constantly innovating in this space and are developing 2nd life swappable batteries for portable storage systems as well as higher powered mobile energy storage systems that will be suitable to replace diesel generators. Read more about Portable Energy Storage Systems.

Are mobile energy storage systems NFPA 855 compliant?

When charging and storing a mobile energy storage system, the requirements are relatively straightforward. The system should be treated as a stationary system as far as the requirements of NFPA 855 go. These requirements will vary based on whether the system is being stored indoors, outdoors, on a rooftop, or in a parking garage. In-transit.

What are the different types of portable battery storage systems?

AceOn currently manufacture and distribute 3 types of portable battery storage systems, sometimes referred to as portable power stations; AceOn Lion ESS PES 2000W - A portable 2kW 1.99kWh energy storage system. AceOn Lion ESS PES 3600W - A portable 3.6kW 3.84kWh energy storage system.

How far can a mobile energy storage system be deployed?

Additional limitations for where a mobile energy storage system can be deployed include a 10 ft (3 m) limitation on how close it can be to various exposures and a 50 ft (15.3 m) limitation on how close it can be to specific

structures with an occupant load of 30 or greater.

Are lithium-ion batteries included in a mobile energy storage standard?

It also goes on to mention that the storage of lithium-ion batteries is included in the scope of the document. The application section then limits the application of the standard to certain-sized mobile energy storage systems.
