

Portable outdoor power supply in container

Overview

What is a mobile solar container portable PV power station?

Introducing our cutting-edge solution for sustainable energy production: the Mobile Solar Container Portable PV Power Stations. Available in both 20ft and 40ft variants, these innovative containers are designed to revolutionize the way we harness and utilize solar power.

Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.

What are mobile solar containers?

Available in both 20ft and 40ft variants, these innovative containers are designed to revolutionize the way we harness and utilize solar power. Efficient Solar Power Generation: Our Mobile Solar Containers are equipped with high-efficiency solar panels that capture and convert sunlight into clean, renewable energy.

How many power supplies can be mounted in a 40ft container?

Power supplies <300kW can be mounted in only a single 40ft container, while greater powers can be achieved in multiple containers and connected upon delivery. Depending upon specifications, containerized power supplies may be stacked, or located side-by-side. Setup and testing or shut-down and packing can be achieved within a matter of days.

Why should you choose an energy storage container?

On-Board Energy Storage: To ensure uninterrupted power availability, these containers come with advanced energy storage solutions. The integrated battery systems store excess energy generated during the day for use during nighttime or cloudy periods, making it a reliable source of power round the clock.

What types of power supplies can be provided?

A wide range of high voltage, CW DC, pulsed or modulated waveform outputs can be provided. The entire system is made to be entirely weatherproof. Power supplies <300kW can be mounted in only a single 40ft container, while greater powers can be achieved in multiple containers and connected upon delivery.
