

Romania photovoltaic water pump inverter manufacturer

Overview

What is veichi SI series solar water pump inverter?

VEICHI SI series solar water pump inverter is a high-efficiency solar water pump controller which can make full use of solar energy to drive water pumps for agricultural irrigation, water supply system, fountains, ground water lowering and etc.

What is a solar water pump inverter?

SI22 solar water pump inverter is cost-effective and economical, small and exquisite, palm-sized, greatly saving installation space and transportation costs. Solar pumping system converts solar energy directly into electric energy, and then drives motors to drive water pumps to pump water from deep wells, rivers, lakes and other water sources.

Which solar water pump inverter is best?

With modular design and IP65 protection, VEICHI SI30 solar water pump inverter is highly praised by customers. SI22 solar water pump inverter is cost-effective and economical, small and exquisite, palm-sized, greatly saving installation space and transportation costs.

Which solar water pumping controller is best?

As the solar water pumping system is eco-friendly and economical, VEICHI SI series solar pumping controllers of high MPPT efficiency have been widely used in many areas such as Africa, India, Middle East, Southeast Asia, South Asia, America and more areas.
