

Russian Cube Energy Storage Battery

Overview

What is a cube battery?

Like the Eos Z3 battery modules they house, our Cube is a self-contained unit—a closed-system design with no delicate internal or external moving parts like AC systems or flow pumps that degrade from continuous, daily wear and tear.

Should Russia create an infrastructure for EV charging stations?

Russia must also "create an infrastructure for charging stations" for EVs, he said. Rosatom announced on November 23 that it had established a new subsidiary — Renera — dedicated to the manufacture of energy storage systems.

How many battery modules are in a cube?

Each Cube is loaded with 672 Eos Z3[™] battery modules—the current generation of our zinc-powered Znyth[™] technology. Designed to meet a wider range of needs. Simple, safe, durable, flexible.

How many battery modules are in a EOS cube?

Shipped ready for deployment, our Eos Cube comes with all battery modules, electrical equipment, and the BMS pre-integrated into a standard 8 x 16-foot outdoor-rated shipping container. Each Cube is loaded with 672 Eos $Z3^{\mathsf{TM}}$ battery modules—the current generation of our zinc-powered Znyth technology. Designed to meet a wider range of needs.
