

# Russian energy storage power station equipment

# **Overview**

How many Russian power plants are equipped with our equipment?

70% of Russian power plants are equipped with our equipment. Power is in our people. Energy in products. In 2018, Power Machines announced the development of its own technology for manufacturing gas turbines with a capacity of 65 MW and 170 MW as a part of the upgrade program for thermal power plants in Russia.

How many wind power stations are there in Russia?

Three large wind power stations (25, 19, and 15 GWt [clarification needed]) became available to Russia after it took over the disputed territory of Crimea in May 2014. Built by Ukraine, these stations are not yet shown in the table above. // 55.0840139; 36.5713472 (Obninsk Nuclear Power Plant).

What are CATL battery-powered energy storage systems?

CATL battery-powered energy storage systems provide energy storage and flexibility in power generation. Instant utilization and energy output due to battery electrochemical technology and the technology of electricity production using gas-piston units can be combined into a single most efficient system.
