

Russian outdoor inverter

Overview

How are inverters decomposed in Russia?

Inverters are decomposed in minute detail, specifically in terms of the critical technologies and an electronic component base that need to be developed in Russia. Creation of advanced modules for inverters in Russia is exemplified with an ongoing project of devel-oping and establishing a production of specialized IGBT modules in MIDAbody.

What is the market of inverters for electric vehicles in Russia?

Market of Inverters for Electric Vehicles in Russia competencies in advanced technical and technological ap-proaches, working out technical solutions and obtaining a product with known characteristics at specific prices. Then, it is necessary to monetize this approach and hone the com-petencies in the development and production of our own chips.

What is a local inverter market?

The main areas of application are analysed and the local inverter market is investigated, specifically in electric transport, solar and wind power generation, dis-tributed smart power systems, including energy storage systems.

Is there a need for a converter in Russia?

In Russia, a number of companies also create electric vehicles, electric buses and infrastructure for their charging, but, unfortunately, imported converter equip-ment is used everywhere and there is no tendency to form teams for research and development of domestic technical solutions.

How ad-vanced inverter components meet international Stan-Dards?

A practical example of the development in Russia of ad-vanced inverter components that meet international stan-dards is the project to create a specialized IGBT module in a low-inductance MIDA body.
