

# Russian outdoor power supply use

# **Overview**

Russia is the fourth largest generator and consumer of electricity in the world. Its 440 power stations have a combined installed generation capacity of 220 GW. Russia has a single synchronous electrical grid encompassing much of the country. The Russian electric grid links over 3,200,000 kilometres (2,000,000 mi) of power lines, 150,000 kilometres (93,000 mi) of which are high voltage cable. HistoryThe electric power industry first developed in Russia under the . The industry was highly regulated particularly by the , the and the .

The -based Russian energy systems machine-building company is the leading Russian equipment producer, with a share of over 50%. It unites production, supply, constructio.

What type of power is used in Russia?

Electricity generation is based largely on gas (46%), coal (18%), hydro (18%), and nuclear (17%) power. 60% of thermal generation (gas and coal) is from combined heat and power plants. Russia operates 31 nuclear power reactors in 10 locations, with an installed capacity of 21 GW.

What is the standard voltage of a power socket in Russia?

All power sockets in Russia provide a standard voltage of 220V with a standard frequency of 50Hz. You can use all your equipment in Russia if the outlet voltage in your own country is between 220V-240V. This is the case in most of Europe, Australia, the United Kingdom and most countries in Africa and Asia.

Does Russia have a wholesale electricity market?

As of 2013, Russia had no wholesale electricity market. The Ministry for Energy of Russia, concerned with price increases envisions a wholesale market under bi-lateral contracts between consumers and specific power plants. Inter RAO and Gazprom Energy Holding were lobbying for a different one.

How many power stations does Russia have?

Its 440 power stations have a combined installed generation capacity of 220 GW. Russia has a single synchronous electrical grid encompassing much of the country. The Russian electric grid links over 3,200,000 kilometres (2,000,000 mi) of power lines, 150,000 kilometres (93,000 mi) of which are high voltage cables over 220 kV.

How much electricity does Russia have?

Globally, Russia ranks fifth in terms of installed electricity capacity and fourth in electricity output. By the end of 2019, the aggregate installed electric power capacity in the Russian Federation (inclusive of isolated power systems and off-grid power plants) was 254 GW with output amounting to 1,096 TWh (terawatt hours).

Does Russia have a two tier electricity market?

Segmentation of the Russian electricity market Russia currently has a two-tier electricity and capacity market (wholesale and retail).
