

Russian small communication photovoltaic base station

Overview

Russian operators will completely switch to domestic base stations by 2029On October 29, 2024, it became known that the Government of the Russian Federation approved the passport of the federal.

Who makes cellular base stations in Russia?

For example, Yadro has opened the first production line in Russia for electronic modules for cellular base stations, Izvestia was told by X Holding, which it belongs to. This is one of the key production elements required for a full-fledged large-scale production of base stations, which is scheduled for the end of this year.

Will Russian base stations speed up the development of Russian components?

Experts consider the mechanism timely, but emphasize that it will not speed up the development of Russian components. In early October 2022, it became known about the decision of the Government of the Russian Federation to support manufacturers of Russian base stations for 4G- and 5G networks.

Will Russian base stations be used in small settlements?

According to him, under these contracts, the Ministry of Digital Development will provide targeted financial support to manufacturers. Shadayev also explained that Russian base stations will be used initially in small settlements.

Will Russia introduce a ballroom system for localization of telecommunications equipment?

At the end of September 2022, it became known about the plans of the Ministry of Digital Development of the Russian Federation to introduce a ballroom system for assessing the localization of telecommunications equipment in order to include its unified register of radioelectronic products. Read more here.

When will Russian base stations be used?

Shadayev also explained that Russian base stations will be used initially in small settlements. Rostelecom President Mikhail Oseevsky, in turn, said that the first batches of Russian base stations are planned to be received in 2022.

When will Russian base stations be available for LTE?

At the end of December 2021, Deputy Prime Minister Dmitry Chernyshenko announced the timing of the start of serial production of Russian base stations for LTE networks. According to preliminary estimates, if demand is provided, we will be able to enter mass production of domestic 4G base stations by 2023, "he told RIA Novosti.
