

# Sierra Leone high-efficiency photovoltaic curtain wall system

114KWh ESS

**PICC**  
MULTI-RISK

**RoHS**

**MSDS**

**UN38.3**

**UK  
CA**

## Overview

---

What is solar photovoltaic curtain wall?

Solar photovoltaic curtain wall integrates photovoltaic power generation technology and curtain wall technology. It is a high-tech product. It is a new type of building material that integrates power generation, sound insulation, heat insulation, safety and decoration functions.

Which solar cells are used in photovoltaic curtain wall?

At present, crystalline silicon solar cells and amorphous silicon solar cells are mainly used in photovoltaic curtain wall (roofing) systems. Photovoltaic glass modules have different color effects depending on the type of product used.

What is a photovoltaic curtain wall (roof) system?

The photovoltaic curtain wall (roof) system, as the outer protective structure of the building, must first have various functions such as weatherproof, heat preservation, heat insulation, sound insulation, lightning protection, fire prevention, lighting, ventilation, etc., in order to provide people with a safe and comfortable indoor environment.

What are the advantages of amorphous silicon curtain wall?

Its advantages are high photoelectric conversion efficiency, small installation size, mature material production and technology. Amorphous silicon curtain wall is a building material combining amorphous silicon solar film cell (such as cuprous sulfide, cadmium sulfide, cadmium telluride, etc.) module array with the curtain wall.
