

# Sine wave inverter power off

# **Overview**

Symptom: The inverter does not power up. Use a multimeter to measure the voltage on the input terminal of the inverter. If the input voltage is lower than 10V, disconnect and recharge the battery. After fully charging the battery, reconnect it to the inverter.

# Sine wave inverter power off

# 1000w pure sine wave inverter with automatic on/off ...

Because of this I really want an inverter that has an automatic on/off (I have also heard this called standby mode and sleep mode). So my inverter will only be ...
