

## Small solar power generation system in Latvia

#### **Overview**

Various funding programs support rooftop solar PV installation, but concerns arise over the focus on suburban areas, neglecting densely populated cities. Amendments to electricity laws introduce net metering and net billing systems, with net metering being phased out by 2029.

#### Small solar power generation system in Latvia

<u>Latvia's path to energy transition: Expanding</u> <u>renewable energy ...</u>

In 2024, solar power in Latvia grew over 3.1 times to 6.7% of total electricity, becoming the third-largest source, while wind reached a record 38 GWh and hydropower, ...
