

# Solar On-site Energy Intranet Network

Cold aisle containment,

making optimal refrigeration effect;

### **Overview**

Why should you use solarnetwork?

Energy data at your fingertips. Put your data to work with our powerful platform. SolarNetwork is an open-source platform providing stable, neutral data-wrangling infrastructure so you can build modern energy apps, report on energy use and generation, and manage your energy assets. Before you can do anything, you need data.

What is the Onsite Energy Program?

Join upcoming events. Contact OnsiteEnergy@ee.doe.gov with questions. The Onsite Energy Program is an initiative to provide technical assistance for industrial facilities and other large energy users to increase the adoption of onsite clean energy technologies.

What is the DOE Onsite Energy Program?

The U.S. Department of Energy's (DOE) Onsite Energy Program provides regionally tailored technical assistance support for industrial sites, and other large energy users, installing electricity generation and storage technologies at their facilities.

How can on-site solar PV & energy storage improve sustainability?

To achieve sustainability goals while meeting the increasing electricity demands of electrification, organizations are pairing on-site solar PV generation with on-site energy storage. These systems, which are considered as "behind-the-meter" (BTM) systems, allow facilities to maximize the benefits of on-site renewable generation.

Who funds the Onsite Energy Program?

The Onsite Energy Program is overseen and funded by DOE's Industrial Technologies Office. The TAPs are also supported by a trio of DOE national laboratories (the National Renewable Energy Laboratory, Oak Ridge National

Laboratory, and Pacific Northwest National Laboratory) with subject-matter expertise in onsite energy deployment.

Where can I find information about Onsite Energy?

Visit the Onsite Energy website to: Learn more about the program. Explore technology areas. Find resources. Join upcoming events. Contact OnsiteEnergy@ee.doe.gov with questions.

## **Solar On-site Energy Intranet Network**

### **On Site Energy**

We have experience helping our clients vet solar projects and developers around the country. The net-metering regulations, RPS requirements, and incentives are constantly changing at the ...

### **Email Contact**

### Onsite Energy, Better Buildings Initiative

Onsite energy refers to electric and thermal energy generation and storage technologies that are physically located at an end-user site and provide energy services directly to the end user.
