

Solar panel cost components

Overview

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. ^{1,2,12} This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400.

How much do solar panels cost?

Solar panels themselves usually cost between \$0.70 to \$1.50 per watt, depending on their efficiency and brand. For an average 6kW system, expect to spend \$4,200-\$9,000 on panels alone. Inverters are another significant component, ranging from \$1,000 to \$2,500 for string inverters, or \$150-\$200 per microinverter.

How much does it cost to install and manage solar panels?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. ^{1,2,12} This figure includes the solar panels, the installation, and other expenses.

What is included in the quoted price of a solar power system?

The quoted price of a solar power system also includes soft costs that are not evident when looking at a completed installation: permitting, inspections, grid interconnection, taxes, transportation, land acquisition, design work, skilled labor, customer acquisition, overhead, profit margins, etc.

What are the components of a solar energy system?

Photovoltaic panels are the most visible part of a solar energy system, but there are many other components at work. These include solar inverters, racking systems, wiring, circuit breakers, and monitoring systems. Depending on how your solar energy system is designed, it may include optional

components like batteries and power optimizers.

How much does a solar load controller cost?

A solar load controller monitors and manages your energy loads and costs around \$150 to \$500. These controllers often come with an app to help you track your energy usage. You could see an increase in your homeowners insurance if you install solar panels, as several studies have shown that solar panels can increase home values.
