

South Africa 5G base station electricity subsidies

Overview

What is the current investment status in 5G in South Africa?

Most respondents highlighted that the current investment status in 5G infrastructure and services in South Africa is quite visible as mobile operators deploy 5G networks, but noted that the subscriber penetration is still below % of the population as at 2020. Most respondents believe it has been very.

Which companies are deploying 5G in South Africa?

Major telecom operators like Vodacom, MTN, and Rain have been rolling out 5G services across various cities. As to SA 5G networks, the deployment is still in the early stages. Most of the current 5G networks in South Africa are non-standalone (NSA), which means they rely on existing 4G infrastructure for certain functions.

Why does South Africa spend so much on energy subsidies?

Most current subsidy spending is directed to propping up existing energy industries rather than promoting the transition to clean energy. The South African government has committed to reducing carbon emissions under both domestic policy and international treaties.

Does South Africa have a 5G market?

The South African 5G market has entered “a dynamic growth phase,” with major telecommunications operators, including MTN and Vodacom, spearheading the rapid expansion of 5G coverage across the country. By the end of 2024, over 50% of the population had access to 5G networks, according to a report by ICT market research firm Africa Analysis.

Does South Africa need a coal-based energy subsidy?

Although this subsidy locks in coal-based electricity, due to the current energy mix in South Africa—coupled with the need to provide affordable and reliable

energy to low-income households—there is still a need for this support.

Is South Africa ready for 5G expansion?

This milestone signals a transformative period for the sector, with further network expansions projected over the next five years. Africa Analysis' 2025 SA 5G Report reveals that South Africa reached 10.8 million 5G subscribers by December 2024, a figure combining mobile users and fixed wireless access (FWA) customers.
