

South Africa Republic New Energy Battery Energy Storage Box

Overview

Where will the battery energy storage project be implemented?

The Project will be implemented at approximately 17 sites, located within or adjacent to existing distribution substations of Eskom, across four provinces of South Africa. The Battery Energy Storage Project (Project) provides a solution to address both challenges.

How does battery storage work in South Africa?

Battery storage systems offer a solution by storing surplus energy generated during peak production periods and releasing it when demand is high, ensuring a consistent and reliable power supply. The South African government has acknowledged the potential of battery storage and has set ambitious targets for its deployment.

What is the largest battery energy storage system in Africa?

Unveiled in 2023, thanks to \$195 million from the International Bank for Reconstruction and Development (IBRD) and \$220 million from AfDB, this flagship project represents the largest battery energy storage system (BESS) on the African continent.

What is a battery energy storage system?

BESS, or Battery Energy Storage Systems, stores electricity in batteries for ondemand power supply. The phrase "battery system" encompasses battery design, engineering, and deployment. Various energy sources like gas, nuclear, wind, and solar can charge BESS, making it crucial for stabilising grids and enhancing renewable energy reliability.

Why is energy storage important in South Africa?

Experts say that widespread energy storage is vital to expanding the reach of renewables and speeding the transition to a carbon-free power grid – this is key to helping reduce South Africa's reliance on fossil fuels as it seeks to

transition to clean energy.

How can South Africa develop a sustainable and competitive battery storage industry?

Addressing this gap is crucial for the development of a sustainable and competitive domestic industry. Competition: The global battery storage industry is already dominated by established players, particularly in Asian countries. South Africa needs to develop a strong value proposition to attract investments and compete effectively.
