

# Sri Lanka outdoor power supply production and processing factory

#### **Overview**

's electricity demand is currently met by nine, fifteen large power stations, and fifteen, with a smaller share from facilities and other renewables such as . Most hydroelectric and thermal/-based power stations in the country are owned and/or operated by the government via the state-run

How many power stations are there in Sri Lanka?

Sri Lanka 's electricity demand is currently met by nine thermal power stations, fifteen large hydroelectric power stations, and fifteen wind farms, with a smaller share from small hydro facilities and other renewables such as solar.

What is the hydropower resource in Sri Lanka?

The hydropower resource in Sri Lanka is divided into two main regions based on water resource, namely the Mahaweli Complex and Laxapana Complex.

Does Sri Lanka have solar energy?

Sri Lanka has vast solar-wind-energy resources due to its location in the Indian Ocean. Eleven wind power plants are currently connected to the national grid. USAID has assessed wind and solar energy potential for Sri Lanka. This information is available at .

Who is Windforce & what is it doing in Sri Lanka?

Besides being the pioneers of renewable energy in Sri Lanka, WindForce has also expanded beyond its borders, and has contributed to plants in Pakistan, Uganda and Ukraine as well.

When did hydroelectricity become popular in Sri Lanka?

Hydroelectricity was popularized as early as the 1920s by Devapura Jayasena Wimalasurendra, who is considered as the "father of hydropower" in Sri Lanka. It lost its majority share on the power grid when further thermal power stations were introduced in 2010.

How has the economic crisis affected the power sector in Sri Lanka?

However, the current economic crisis has affected all key segments of the economy, including the power sector. Electricity in Sri Lanka is generated using three primary sources: thermal power (which includes coal and fuel oil), hydropower, and other non-conventional renewable energy sources (solar power and wind power).
