

Swedish power generation container manufacturer

Overview

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for $+45^{\circ}\text{C}$. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

What is a containerized power module?

Fueled by natural gas, the power module is dedicated to the production of electrical energy. Containerized power module with a power output of 3MW. Plymouth, UK. Flexible generation power plant to balance the local electricity network in an area with growing demand. 2 containerized power modules with a combined power of 5 MW. Yeovil, UK.

What is the standard ventilation for genset containers?

The standard ventilation is designed for ambient temperatures from -25°C to $+40^{\circ}\text{C}$. The genset containers can be equipped with several additional features to enable operation at lower temperatures on request. Type 6 containers are available with a similarly broad range of options that we offer for the Type 2 / 3 / 4 containers.

Swedish power generation container manufacturer

[Containerised Generators: Flexible and Reliable ...](#)

To create space and provide extra protection for your generator, choose a container-built power station. Our weather-resistant container-built generators ...
