

# The cost of photovoltaic plus energy storage per kilowatt-hour

#### **Overview**

How much does a PV system cost?

Our operations and maintenance (O&M) analysis breaks costs into various categories and provides total annualized O&M costs. The MSP results for PV systems (in units of 2022 real USD/kWdc/yr) are \$28.78 (residential), \$39.83 (community solar), and \$16.12 (utility-scale).

How long does a PV solar system last?

In general, the payback time can range from 5 to 10 years. However, it depends on several factors, such as the initial cost of the system, available incentives, rebates, the cost of electricity where you live, and the amount of PV solar electricity you can store and use.

How much does a PV system cost in 2022?

The current MSP benchmarks for PV systems in 2022 real USD are \$28.78/kWdc/yr (residential), \$39.83/kWdc/yr (community solar), and \$16.12/kWdc/yr (utility-scale, single-axis tracking). For MMP, the current benchmarks are \$30.36/kWdc/yr (residential), \$40.51/kWdc/yr (community solar), and \$16.58/kWdc/yr (utility-scale, single-axis tracking).

How efficient is a residential PV system in 2024?

The representative residential PV system (RPV) for 2024 has a rating of 8 kW dc (the sum of the system's module ratings). Each module has an area (with frame) of 1.9 m 2 and a rated power of 400 watts, corresponding to an efficiency of 21.1%.

How much would a PV system cost without a 45x credit?

Without the 45X credit eligible for domestically assembled modules, inverters, and battery packs the MMP of the residential PV and PV-plus-storage system would have been \$2.90/Wdc and \$4.93/Wdc, respectively.

Does NREL have a cost benchmark for PV-plus-storage systems?

NREL's 2018 cost benchmarks for installed PV systems showed a continuing decline in cost for residential- and commercial-scale systems, and it revealed a slight increase in cost for utility-scale systems. A similar report established NREL's first such cost benchmarks for PV-plus-storage systems.

### The cost of photovoltaic plus energy storage per kilowatt-hour

# NREL Publishes Annual PV Costs Report; Sets Benchmark for PV-Plus

The National Renewable Energy Laboratory (NREL) published the annual report tracking the costs of standalone photovoltaics as well as the cost of photovoltaics with energy ...

#### **Email Contact**

It is crucial to understand the expenses associated with solar storage, specifically the Energy Storage Cost per kWh and the Levelized Cost ...
